Introduction

This document is designed to familiarize you with the Infotainment Core Expansion™ module (ICE). Before attempting to set up the system, be sure to read and understand this manual in its entirety.

ICE

Murphy's Infotainment Core Expansion™ module (ICE) brings sound control, connectivity, customization and more to the water. With software and hardware designed to fit with the existing PowerView® line of displays, ICE takes the functionality of stereo and multifunctional displays and brings them to the recreational marine market.

ICE software features the standard radio and stereo functions expected, but it also allows for Bluetooth connectivity that allows hands-free notifications on the display for new texts, missed and incoming calls, signal strength, battery life and BT connection status. The software also offers audio profiles, four zone control, five band EQ and customizable sound control. By giving users the ability to sync their smartphone, ICE brings car-like features designed to withstand the marine environment.

The ICE software includes:

- AM/FM
- Auto Station Discovery (finds local stations from any city)
- Auto Discover Based on PTY Category (e.g., scan for all rock stations)
- Favorites / Presets
- Search Stations by Genre (PTY category)
- PTY Recognition (genre radio artwork)
- Bluetooth Phone notifications and Audio
- Hands-free Notifications (new texts, missed calls, incoming call, signal strength, battery life, BT connection status)
- Auxiliary
- Audio Profiles
- Four Zone Control
- Five Band EQ
- Customizable Sound Control

The ICE hardware features:

- Internal Source
- AM Tuner
- Weather Band
- Digital FM Tuner (with RDS, Title Tagging)
- Bluetooth Audio

The ICE inputs are:

- 3.5 mm Analog Stereo Aux Input
- Two 2-channel RCA Analog Inputs
- Networking and Device Connections
- Bluetooth Audio Streaming
- Hands-free Bluetooth Notifications

The ICE audio features include:

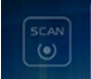

- Eight Channels with 4V RMS Differential Pre Out for Audio Quality
- Four Zones with Level and EQ Control
- Five Band Tone Control
- Remote Control Capabilities
- Wireless RF Receiver for Remote Control
- Wired Remote Capability

Bluetooth

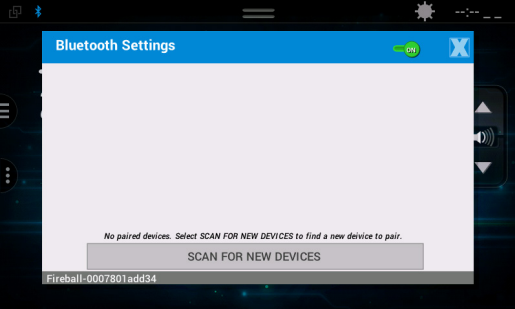

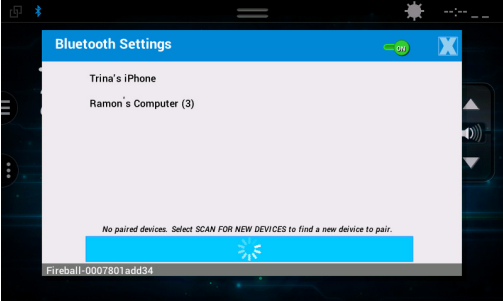

To display the Bluetooth utility, touch  on the left side of the screen. Then touch . The following screen will display:

At the top of the screen, touch , and the following screen will display:

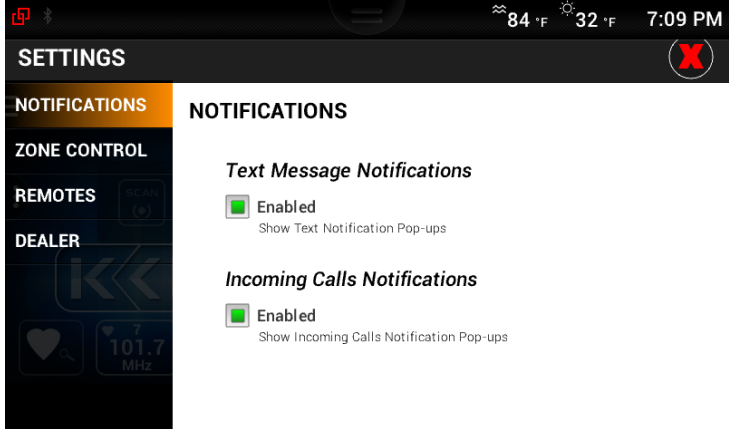

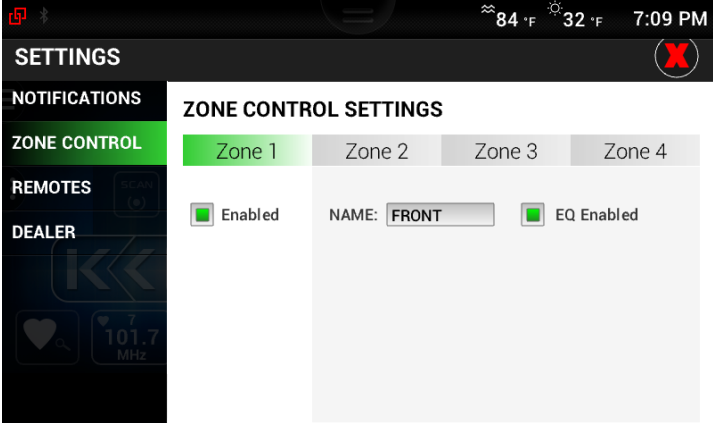

Follow these steps to connect to Bluetooth:

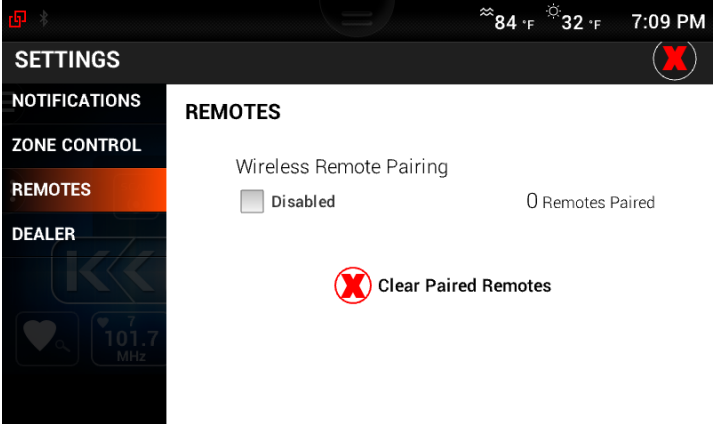

Step	Action
1	<p>Touch the Settings icon . The following screen will appear:</p> 
2	<p>Ensure the green slider at the top right is turned ON. If not, slide it to the right.</p>
3	<p>Touch Scan for New Devices to discover available Bluetooth compatible sources. If sources are found, they will appear on the screen:</p> 
4	<p>Touch the device to which the Bluetooth will be paired. The following screen will appear:</p>  <p>Touch the green check mark to pair or the red X to cancel. If successful, a message stating Paired will appear.</p>

Settings

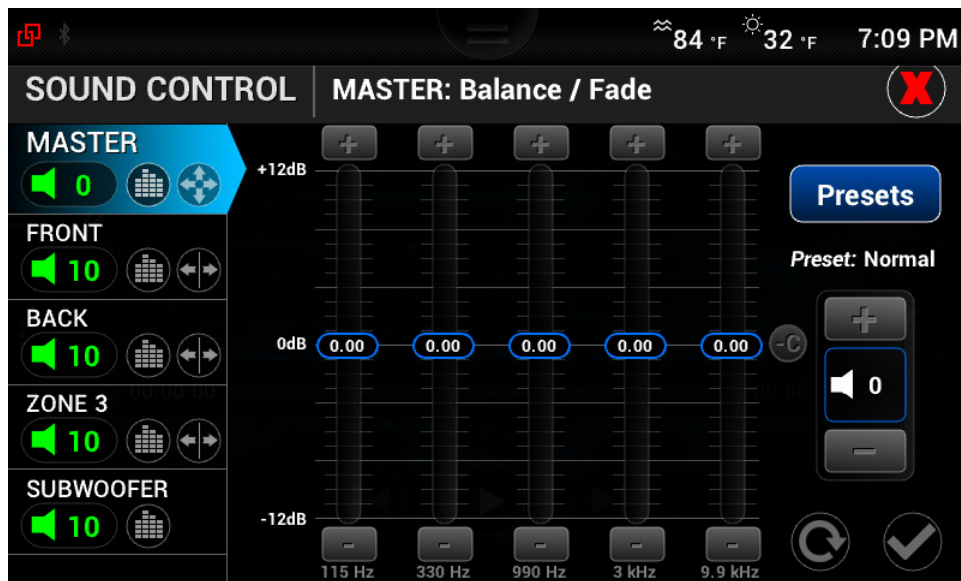

The Settings section allows the adjustment of the following:

- Notifications
- Zone Control
- Remotes
- Dealer

Section	Description
<p>Notifications</p>	 <p>To enable pop-up notifications to appear on the screen from a connected Bluetooth phone's text messages, touch the Enabled box for that selection.</p> <p>To enable pop-up notifications to appear on the screen from a connected Bluetooth phone's incoming calls, touch the Enabled box for that selection.</p>
<p>Zone Control</p>	 <p>To enable Zone Control (sounds) to be heard in any of the zones listed on the screen, touch the preferred Zone then touch Enabled.</p>

Section	Description
Remotes	 <p>To enable wireless remote pairing, ensure the Disabled box is not checked or filled in. Then press any key on the remote to pair.</p> <p>Touch the red X to clear any paired remotes.</p>
Dealer	This screen displays the IP Address.

Sound Control (Equalizer)

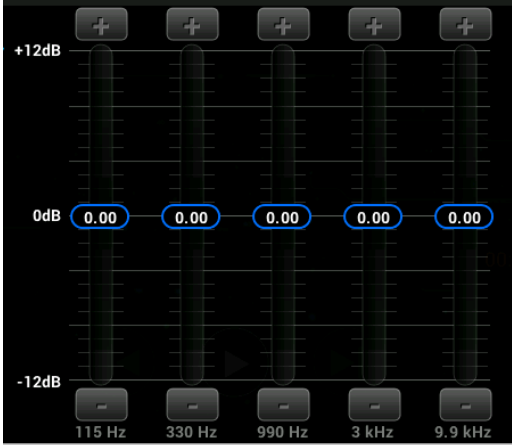

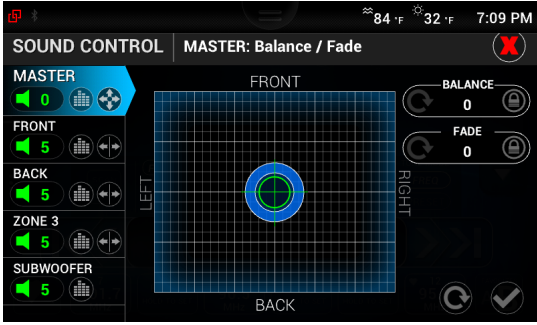

The 5 Band Equalizer allows the sound to be modified in all four zones or in the Master:

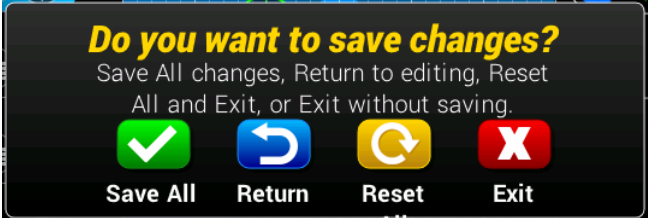

- Subwoofer
- Front
- Back
- Zone 3

- Master

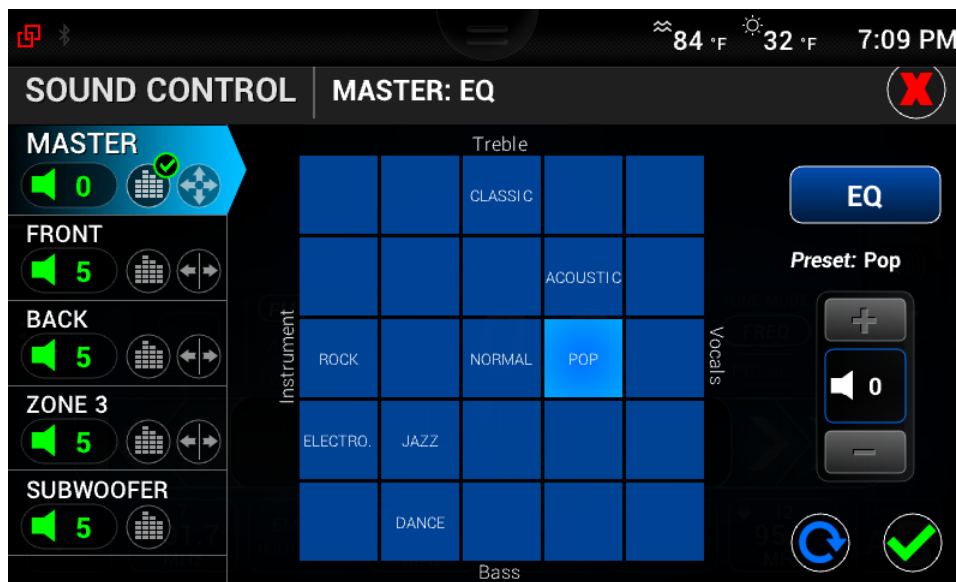

To control the sounds for the Master, touch Master, and the blue background will appear as shown below.

Touchpoint	Description
	<p>Volume Control: To turn off the volume in all areas, touch this, and it becomes a red X. To adjust the volume for the Master, touch the + or – of this area:</p> 
	<p>Equalizer: Touching this area displays the Equalizer controls:</p>  <p>Touch the + or – OR slide your finger in the appropriate direction to adjust the levels.</p>
	<p>Balance/Fade: Touching this area displays the Balance/Fade controls:</p> 

	Slide your finger to adjust the blue circle on the screen to the preferred location.
Touchpoint	Description
	<p>Reset / Confirm: Touch the blue circle to discard any changes. Touch the green check mark to confirm changes. If the red X is pressed before accepting the changes, the following screen will appear:</p>  <p>Press Save All to save any changes; Return to make additional changes; Reset to return all controls back to their previous state; or Exit to delete any changes.</p>

Presets

Presets allows the choosing of pre-established equalizer settings for various classifications of music (e.g., Rock, Electronic, Jazz, Dance, Pop, Acoustic and Classic). Typically, Jazz, Dance and Rock lean heavily upon instruments and bass than Acoustic and Pop, which lean heavily upon treble and vocals.

Touch the appropriate square to enable these pre-established settings. Then touch the green check mark to save these settings.

NOTE: Notice the green check mark on the Equalizer symbol beside Master. This appears whenever a change is made but has not yet been saved. Once saved, that check mark will disappear.
